

Pyrobel-Pyrobelite | Pyrobelite

Brand Pyrobel-Pyrobelite

Laminated fire-resistant glasses

In case of fire, Pyrobel-Pyrobelite laminated fire-resistant glasses comprising clear Planibel glasses and transparent interlayers transform into opaque screens that keep out flames and reduce or arrest heat transmission.

The product choice depends on:

- the level of fire resistance under national regulations
- the type of application
- the type-approvals for frames and sizes in each country

Pyrobelite - Description

Pyrobelite fire resistant laminated glass

Functions: Integrity (no flames) with limited heat radiation

Duration: 30 or 60 minutes

European ratings: EW30 or EW60

Available:

- in single glass for interior applications
- in reinforced single glass for exterior or safety/security applications
- in double glazed units, combined with other AGC Flat Glass Europe glasses.
